## 2A, 30V, 340KHz Synchronous Step-Down Converter

## DESCRIPTION

The EUP3282H is a synchronous current mode buck regulator capable of driving 2 A continuous load current with excellent line and load regulation. The EUP3282H can operate with an input range 4.5 V to 30 V and the output can be externally set from 0.92 V to 20 V with a resistor divider.

Fault condition protection includes cycle-by-cycle current limiting and thermal shutdown. In shutdown mode the regulator draws $3 \mu \mathrm{~A}$ of supply current. Programmable soft-start minimizes the inrush supply current and the output overshoot at initial startup. Automatic pulse skipping mode operation increase efficiency at light loads.

The EUP3282H require a minimum number of external components.
