# EUTECH <br> <br> 8A, 30V, Synchronous Step-Down <br> <br> 8A, 30V, Synchronous Step-Down Converter with Programmable Frequency 

## DESCRIPTION

The EUP3288 is a synchronous, step-down constant ontime buck regulator capable of driving 8 A continuous load current. The EUP3288 can operate with an input up to 30 V and the output can be externally set down to 0.8 V . The EUP3288 provides excellent transient response with constant on-time control method while maintaining a nearly constant frequency. The switching frequency can be externally programmed from 100 KHz to 1 MHz .

Fault condition protection includes VIN under-voltage lockout, cycle-by-cycle current limiting, output overvoltage protection, output under-voltage protection, as well as thermal shutdown. Internal soft-start minimizes the inrush supply current and the output overshoot at initial startup.

The EUP3288 is available in a $4 \mathrm{~mm} \times 4 \mathrm{~mm}$ TQFN-23 package.

## FEATURES

- Wide Input Voltage Range: 4.5 V to 30 V
- 8A Output Current
- Excellent Line and Load Transient Responses
- Integrated $23 \mathrm{~m} \Omega \mathrm{~N}$-Channel MOSFET for High Side
- Integrated $13 \mathrm{~m} \Omega \mathrm{~N}$-Channel MOSFET for Low Side
- Programmable PWM Frequency from 100 KHz to 1 MHz
- Internal Soft-Start
- Selectable Forced PWM or Automatic PFM/PWM Mode
- Power Good Monitoring
- Under-Voltage Protection
- Over-Voltage Protection
- Cycle-by-Cycle Current Limit
- Over-Temperature Protection
- Available in TQFN-23 4mmx4mm Package
- RoHS Compliant and Halogen-Free

## APPLICATIONS

- Notebook
- Mother Board
- Table PC
- Hand-Held Portable
- AIO PC
- Set-top boxes
- LCD TV
- Telecom/Networking/Datacom equipment

## Typical Application Circuit
